TESTIMONIAL

“As a long time back pain sufferer with failed back surgery syndrome, as well as all the aches and pains that go with overcompensating for the back issues, I was elated when I found Sensi Chews! They are great for on-the-go dosing. The convenient marked dose & re-closeable packaging are convenient and always consistent. The CBD chews are fantastic to help ease my pain, without the heady high from the THC.”

EG, Hemet CA

HOW IT WORKS

The cannabis medicine enters the blood stream first through oral membranes in the mouth, then absorbed through the gastrointestinal track and finally processed through the liver. The body’s Endocannabinoid System (ECS) primary receptors CB1 and CB2 are effected by the incoming cannabinoids and serve distinct functions in managing pain, health and well-being. CB1 receptors are primarily found in the brain and central nervous system. CB2 receptors are mostly found in the peripheral organs and cells associated with the immune system. All of the cannabinoids found in cannabis work together to provide synergistic advantages with cells from both CB1 and CB2 receptors. In addition to cannabinoids and common to all plants used for compounding remedies and medicine, cannabis plants also contain terpenes and terpenoids that give plants their smell and taste and which provide a broad spectrum of medical, nutritional, and health benefits.

HOW TO DOSE

Medicated edible dosing is unique to each patient. To achieve best results experimentation and testing is needed to find the most effective approach. Several factors will effect how it works, such as dose consumed, age of patient, with food or on an empty stomach, time of day, with other drugs, and the experience of the patient with other cannabis therapy. Patients should keep notes when they begin until the desired effect is determined.

Sensi Chew CBD Platinum comes in 10-9MG doses. Try 1 dose (9MG) or less to see how your body responds. High doses of CBD can act as a stimulant for some patients. Wait at least 90 minutes before consuming more. Chew slowly and allow the caramel to melt in your mouth for faster onset and absorption through the oral membranes.

TESTIMONIAL

"I highly recommend the Sensi Chew CBD product for anyone dealing with stomach pains. I've had stomach problems starting from early teens and had gone through numerous tests in hospitals and still no answers. Shortly after taking a Sensi Chew CBD my stomach started to improve and has continued to do so over a period of time. Please try this product if you are experiencing ANY stomach issues."

Ryker, Temecula CA

HOW TO DOSE *continued...*

The effects should begin between 30min to 90min after consumption, with peak effects at 90min to 2 hours, and lasting for up to 4 to 8 hours. Each patient's metabolism is different and the onset and duration will vary.
