

Sensi Chew CBD Gold 100MG, 1:1

CBD-rich, Gluten-free, Low Calorie

Anytime

Sensi Chew CBD Gold 100MG, 1:1 is for patients with pain, who want greater pain relief with reduced THC, and have some THC tolerance. It contains a total 100MG of concentrated cannabinoid extract with 50% CBD and 50% THC (1:1) suspended in a chewy chocolate caramel. The cannabinoid profile is 50% CBD and 50% THC with small amounts of CBC, CBN, CBG, THCV, and other whole plant cannabinoids and terpenoids. Those who are new to or have a low tolerance with medicated edibles should proceed slowly.

TESTIMONIAL

"As a long time back pain sufferer with failed back surgery syndrome, as well as all the aches and pains that go with overcompensating for the back issues, I was elated when I found Sensi Chews! They are great for on-the-go dosing. The convenient marked dose & re-closeable packaging are convenient and always consistent. The CBD chews are fantastic to help ease my pain, without the heady high from the THC."

EG, Hemet CA

HOW IT WORKS

The cannabis medicine enters the blood stream first through oral membranes in the mouth, then absorbed through the gastrointestinal track and finally processed through the liver. The body's Endocannabinoid System (ECS) primary receptors CB1 and CB2 are effected by the incoming cannabinoids and serve distinct functions in managing pain, health and well-being. CB1 receptors are primarily found in the brain and central nervous system. CB2 receptors are mostly found in the peripheral organs and cells associated with the immune system. All of the cannabinoids found in cannabis work together to provide synergistic advantages with cells from both CB1 and CB2 receptors. In addition to cannabinoids and common to all plants used for compounding remedies and medicine, cannabis plants also contain terpenes and terpenoids that give plants their smell and taste and which provide a broad spectrum of medical, nutritional, and health benefits.

HOW TO DOSE

Medicated edible dosing is unique to each patient. To achieve best results experimentation and testing is needed to find the most effective approach. Several factors will effect how it works, such as dose consumed, age of patient, with food or on an empty stomach, time of day, with other drugs, and the experience of the patient with other cannabis therapy. Patients should keep notes when they begin until the desired effect is determined.

Sensi Chew CBD Gold 100MG, 1:1 comes in 4-25MG doses. Try 1/2 dose (12-14MG) or less to see how your body responds. Wait at least 90 minutes before consuming more. This is very potent and caution should be used. Keep out of reach of children. Chew slowly and allow the caramel to melt in your mouth for faster onset and absorption through the oral membranes.

THCV is a mild psychoactive cannabinoid. Therapeutic effects include reduction of appetite, weight loss, decreased body fat, anticonvulsant, anti-inflammatory.

TESTIMONIAL

"I highly recommend the Sensi Chew CBD product for anyone dealing with stomach pains. I've had stomach problems starting from early teens and had gone through numerous tests in hospitals and still no answers. Shortly after taking a Sensi Chew CBD my stomach started to improve and has continued to do so over a period of time. Please try this product if you are experiencing ANY stomach issues."
